

MH3022/MH3024

MATERIAL HANDLERS

CAT[®]

THE NEW CAT® MH3022/MH3024 MAXIMIZE YOUR PERFORMANCE

When it comes to material handling equipment, your success depends on productivity and low operating costs. The Cat® MH3022 and MH3024 are purpose-built material handlers that feature simple-to-use technologies, a redesigned cab, and more options to match your work. Combine these features with up to 10 percent lower operating costs, and you have a safe, quality, and reliable product that will provide you with the performance you need for your toughest material handling applications.

Ready to help you make your business stronger, Cat Next Generation Material Handlers give you new ways to get the most work done at a cost that fits your business.

MH3022

- + FOUR BOOM OPTIONS
- + FIVE STICK OPTIONS
- + 3700 KG (8,160 LB) COUNTERWEIGHT
- + 10 420 MM (34'2") MAXIMUM REACH

MH3024

- + FOUR BOOM AND FOUR STICK OPTIONS
- + THREE UNDERCARRIAGE OPTIONS
- + 4200 KG (9,260 LB) OR 4700 KG (10,350 LB) COUNTERWEIGHT
- + 12 010 MM (39'5") MAXIMUM REACH

SUPERIOR PERFORMANCE

Featuring faster cycle times and wider machine footprints, the MH3022 and MH3024 provide optimal performance and stability for your day-to-day operations.

UP TO 10% LOWER OPERATING COSTS

Extended and synchronized service internals and an electrically driven fan with an auto reverse function lower maintenance costs. The advanced electro-hydraulic system balances power and efficiency, reducing fuel consumption.

ENHANCED CAB COMFORT

Operate comfortably with the ergonomic control layout and multiple cab options. Get better visibility with rear- and side-view cameras and an optional 360-degree machine view system.

UP TO 10% LOWER OPERATING COSTS

**LESS MAINTENANCE,
MORE PROFITABILITY**

NOTE: COMPARISON IS BASED ON THE PREVIOUS MODEL.

STRONG. PRODUCTIVE. EFFICIENT. BUILT TO LAST

FUEL SAVING PERFORMANCE

Use up to 10 percent less fuel than the previous models. The MH3022 and MH3024 feature a high-efficiency, electrically driven cooling fan that runs only when you need it. An advanced hydraulic system provides the optimum balance of power and efficiency while providing the control you need.

STRENGTH WHERE IT MATTERS

Count on your machine to withstand wear throughout the years. Boom, sticks, and other high-stress areas are reinforced with thick multi-plate fabrications to ensure quality and reliability. The upper frame uses specially designed mountings to support the heavy-duty cab, and the lower frame is reinforced to enhance component durability.

RELIABLE IN ANY ENVIRONMENT

The MH3022 and MH3024 have a standard high-ambient temperature capability of 52°C (125°F) and a cold start capability of -18°C (0°F). Both machines can work up to 3000 m (9,840 ft) above sea level without derating. A standard auto reversing fan and optional vibrating grill allow you to work in dusty, indoor environments.

**LOWER OPERATING COSTS
UP TO 10%**

DO MORE. PAY LESS.

With extended and more synchronized maintenance intervals, you get more done at a lower cost. Consolidated filter locations make service faster.

INFORMATION AT YOUR FINGERTIPS

View operating information such as fuel levels and critical service alerts on the in-cab touchscreen monitor. Your machine's filter life and maintenance intervals are also trackable on the in-cab monitor.

NEW LONGER-LASTING FILTERS

The new hydraulic oil filter provides improved filtration performance, anti-drain valves to keep oil clean when the filter is replaced and lasts up to 50 percent longer than previous filter designs.

NEW CAB DESIGN

MAKES HARD WORK EASY

Comfort and movement efficiency help keep you productive and alert all shift long. A tip-up left console lets you get in and out of the cab easily, and the seat is wide and adjustable for operators of virtually any size.

OPTIONS TO FIT YOUR NEEDS

Chose between a Deluxe or Premium cab. Both options feature a 254 mm (10") LED touchscreen monitor. The Deluxe cab features an air suspension, heated seat. The Premium cab features an automatic suspension, heated, and ventilated seat.

CUSTOMIZABLE JOYSTICKS

Joystick functions can be customized through the monitor. Joystick pattern as well as control response can be set to match operator preference. All preferences are saved with the Operator ID.

KEYLESS PUSH TO START

The MH3022 and MH3024 use a keyless push-button engine start. This adds security for the machine by using Operator ID codes to limit and track machine access. Codes can be entered manually or via an optional Bluetooth® key fob or smartphone app.

TOUCHSCREEN MONITOR

Most machine settings can be controlled through the high-resolution 254 mm (10") touchscreen monitor. It offers 42 languages and is easy to read from the seat.

REDUCE OPERATOR FATIGUE

ERGONOMIC LAYOUT

Controls are easy to reach, allowing you to operate comfortably with minimal twists and turns. Joystick steering is standard, allowing you to move the machine with minimal movement.

REDUCED CAB VIBRATIONS

Work more comfortably with reduced cab vibrations from advanced viscous mounts.

BLUETOOTH CONNECTION

Bluetooth-integrated radio allows for seamless mobile phone connection to listen to music and podcasts and for hands-free calling.

DO MORE

VERSATILITY KEEPS YOU
PRODUCTIVE AND PROFITABLE

Cat Material Handlers are designed and built for your demanding industry. These aggressive machines deliver fast, mobile, and efficient performance.

POWER WHEN YOU NEED IT

Equip your machine with an optional 15 kW generator for magnet operation.

CUSTOMIZABLE DESIGN

Match your machine to the job. The MH3022 offers ten boom and stick combinations, while the MH3024 offers eight. The boom and stick options as well as multiple undercarriage configurations allow you to customize your machine to meet the demands of your application.

MULTI-PROCESSORS

INCREASE YOUR PRODUCTIVITY AND PROFIT WITH CAT ATTACHMENTS

Easily expand the performance of your machine by using Cat attachments. Each Cat attachment is designed to fit the weight and horsepower of Cat Material Handlers for improved performance, safety, and stability. Complete attachment guides can be found in the technical specifications documents.

SAFETY FEATURES

LOOK OUT FOR YOUR PEOPLE
AND EQUIPMENT

CAB AVOIDANCE

Like an invisible barrier around the TOPS-certified cab, standard Cab Avoidance helps prevent your attachment from coming into contact with the cab. This helps protect you from harm and reduces the risk of equipment damage.

UPPER PLATFORM ACCESS

The service platform design provides easy, safe, and quick access to the upper platform. The steps use anti-skid punch plate to prevent slipping. The cab features a working-at-height tie-off provision for increased safety.

SECURE START

Use your PIN code on the monitor or the optional Bluetooth key fob to enable the push-button start feature.

SEE THE JOBSITE AROUND YOU

Enlarged windows and improved machine layout increase visibility from the seat of the cab. Standard rearview and right-side-view cameras always keep operators aware of their surroundings. An optional 360° visibility feature is also available. Powerful, long-lasting LED lights consume minimal power, keeping you safe while working in the dark. Choose between a fixed, one-piece, laminated P5A or P8B glass windshield to protect you from debris falling toward the cab. The standard TOPS cab meets ISO 12117-2:2008 requirements and helps block outside noise.

CAT LINK TECHNOLOGY

TAKES THE GUESSWORK OUT OF MANAGING YOUR EQUIPMENT

Cat Link telematics technology helps take the complexity out of managing your jobsites by gathering data generated by your equipment, materials, and people and serving it up to you in customizable formats.

PRODUCT LINK™

Product Link collects data automatically and accurately from your assets – any type and any brand. Information such as location, hours, fuel usage, productivity, idle time, maintenance alerts, diagnostic codes, and machine health can be viewed online through web and mobile applications.

VISIONLINK®

Access information anytime, anywhere with VisionLink. Use it to make informed decisions that boost productivity, lower costs, simplify maintenance, and improve safety and security on your jobsite. With different subscription level options, your Cat dealer can help you configure exactly what you need to connect your fleet and manage your business without paying for extras you don't want. Subscriptions are available with cellular or satellite reporting (or both).

REMOTE SERVICES

Remote Services is a suite of technologies that improve your jobsite efficiency.

- + **Remote Troubleshoot** allows your Cat dealer to perform diagnostic testing on your connected machine remotely, pinpointing potential issues while the machine is in operation. Remote Troubleshoot helps ensure the technician arrives with the correct parts and tools the first time, eliminating additional trips to save you time and money.
- + **Remote Flash** updates on-board software without a technician being present, potentially reducing update time by as much as 50 percent.
- + The **Cat App** helps you manage your assets – at any time – right from your smartphone. You can see your fleet location, hours, and other information. You will get critical alerts for required maintenance, and you can even request service from your local Cat dealer.
