POWER TRAIN

POWERFUL EFFICIENCY

Staying ahead of the competition, Caterpillar offers a wide variety of cutting-edge technology and components that are specifically built to save time and reduce fuel costs.

ENGINE AND EMISSIONS

Powered by a Cat engine and certified to meet emission standards, these machines feature the Engine Idle Management System (EIMS) to minimize idle RPM and fuel consumption. Auto Idle Shutdown will shut down engine after a preset time.

TRANSMISSION

The Cat planetary powershift transmission is a proven design, made in-house, for high reliability and long service life.

CONTROL VALVES

The well-known Cat electronic clutch is a pressure-compensated, single-clutch shifting system which allows smooth, efficient gear changes in all operating situations.

DURABLE AXLES

Heavy-duty axles with inboard final drives feature hydraulically activated wet-disc brakes. Optional axle oil coolers (AOC) are available for high-energy applications. The optional limited slip differential (LSD) is automatically activated and increases traction in poor underfoot conditions.

ON-DEMAND FAN

Variable speed fan adjusts to meet the cooling requirements of the machine, lowering fuel consumption, noise levels, and radiator plugging. In very dusty conditions, an optional reversing fan reduces cleaning needs.

PRODUCTIVE RESULTS

WORK SMART AND MOVE MORE

PERFORMANCE SERIES BUCKETS

Easy-to-load Performance Series Buckets also improve material retention and reduce dig times. These buckets significantly improve productivity and fuel efficiency, resulting in unsurpassed production capabilities with increased bucket fill factors by up to 10% compared to legacy designs.

LOAD SENSING HYDRAULICS

Load sensing hydraulic system produces flow and pressure for the implement system only when needed, improving machine productivity and resulting in lower fuel consumption. An optional third hydraulic function is also available to control a variety of work tools.

Z-BAR LINKAGE

The proven Z-bar linkage with cast cross-member and tilt lever combines digging efficiency and high breakout forces for superior production capabilities.

RIDE CONTROL SYSTEM

The optional ride control system improves ride, performance, and load retention when traveling over rough terrain and at higher speeds, lowering cycle times and boosting productivity.

OPTIONAL PRODUCT LINK™

Track asset location, hours, fuel usage, diagnostic codes, and idle time to improve your productivity and lower your operating costs.

CAT PAYLOAD KIT (Optional)*

Track productivity from the cab with quick access to information such as truck target weights, loads, and totals.

OPERATOR ENVIRONMENT

COMFORTABLE CAB, INTUITIVE CONTROLS

A spacious cab features easy, intuitive controls and excellent visibility, which provides a comfortable working environment.

ENTRY AND EXIT

Ladders are standard on both sides of the machine for easy access to the cab from the left-hand side and to service points from the right-hand side. The operator station is equipped with handrails for cab accessibility.

DISPLAY AND INTERFACE

Simple to operate, the complete user interface has been designed as an intuitive system, allowing the operator to monitor machine health.

VISIBILITY AND SAFETY

Extended windows with wide, flat, and distortion-free front windshield combined with rearview mirrors with spot mirrors offer excellent visibility. A front window cleaning platform kit is available for enhanced access to the windshield. A rearview camera is standard, and a windshield guard option is available. Reversing strobe light kits are available options for enhanced jobsite visibility.

EASY CONTROLS

The pilot-operated hydraulic controls deliver comfortable, low-effort operation. Single axis levers or joystick are available, and the adjustable steering column includes a manual shifter. Both options are equipped with remote transmission kick-down switches.

CLIMATE CONTROLLER

Air conditioning and louvered vents let the operator direct air flow. The fresh air and recirculation cab air filters allow for superior filtration and easy cleaning.

COMFORTABLE SEAT

The comfort cloth mechanical suspension seat provides a variety of adjustments with an arm and headrest. An air suspension seat option is available.

SUPPORT ALL YOUR JOBSITE NEEDS

For specific applications, you need a wheel loader that is purpose built for the job. Cat work tools are engineered to handle all of your specific worksite needs.

FUSION™ QUICK COUPLER

The Fusion Quick Coupler System allows machines to use a wide range of tools that can each be picked up by machines of varying sizes. Fusion is designed to integrate the work tool and the machine by pulling the coupler and tool closer to the loader, increasing overall lift capability.

- + Improved machine performance
- + Unsurpassed durability
- + Good visibility

PERFORMANCE SERIES BUCKETS

Performance Series Buckets use a system-based approach to balance bucket shape with the machine's lift and tilt capacity, weight, and linkage. A variety of bucket styles match the machine to the application and material moved.
